

Hydro Guard™ - U4000-CER MICROCERAMIC

Under Counter Water Filtration System

Hydro Guard™ Total Care Water Systems are high performance water filtration systems designed to substantially improve the quality of your drinking water. They provide great tasting water while producing water that is cleaner, healthier and safer. Hydro Guard effectively transforms your water from questionable to premiere quality in a matter of seconds!

Hydro Guard™ Total Care Water Filtration Systems are designed to address a broad range of issues relating to your drinking water like taste, odor, chlorine and most importantly, items of health concern that are paramount to your family's health and wellbeing.

The Hydro Guard™ U4000-CER incorporates four multi-stage water filtration cartridges designed to provide you with 1,200 gallons of premium quality drinking water!

PRODUCT BENEFITS

- ✓ Excellent Contaminant Reduction**
- ✓ Superior Taste, Odor and Chlorine Reduction**
- ✓ VOC, Pesticide, Herbicide Reduction**
- ✓ 1,200 Gallon Capacity**
- ✓ 0.5µ Filtration
- ✓ Carbon Block Certified by NSF®
- ✓ Cyst Removal **
- ✓ Quick & Easy Install
- ✓ Microban® Antimicrobial Technology

PRODUCT SPECIFICATIONS

Rated Capacity:	1200 gallons (4542.50 L)
Micron Rating:	0.5µ
Replacement Filter:	HDG-SED5 HDG-CER HDG-SIL HDG-CB5P
Flow Rate:	.75 GPM (2.84 LPM) @ 60psi
Maximum Working Pressure:	100 psig (689.5 kPa)
Minimum Working Pressure:	30 psig (206.8 kPa)
Maximum Operating Temperature:	100 °F (38 °C)
Minimum Operating Temperature:	34 °F (1 °C)

Hydro Guard™ - U4000-CER MICROCERAMIC

Under Counter Water Filtration System

CARTRIDGE 1 - HDG-SED5

The HDG-SED5 prefilter is a specially manufactured high performance sediment filter designed to give you high dirt holding capacity, reduce sediment and rust particles and extend the life of additional filters. Its micro-fine web design traps particles and helps keep other filters in the filtration system working at optimal performance.

CARTRIDGE 2 - HDG-MCB

Stage 1 –

Hydro Guard's radial flow filtration allows water to enter the cartridge through the radius of the filter. This allows the Sub-Micron Ceramic outer layer to trap and retain larger particles and ensures key microbial filtration.

Stage 2 –

After water passes through the Microceramic outer layer it then enters and passes through the NSF Certified Coconut Shell Solid Carbon Block filter to reduce additional items of health concern. The 0.5 micron carbon block pores micro-strains the water and through the carbons Chemisorptive process it effectively reduces Volatile Organic Compounds (VOC's – Organic Chemicals), PCB, Pesticides, Herbicides, Chloroform and other chlorination by-products.

CARTRIDGE 3 - HDG-SIL

The HexoSoft Filter cartridge is designed to provide crystal clear drinking water and aid in the prevention of limescale growth at the faucet. It also aids to improve taste and odor in your drinking water which results in better tasting, better brewed coffee; better tasting tea; and better tasting mixed beverages.

CARTRIDGE 4 – HDG-CB5P

The final stage is the exclusive Hydro Guard™ HDG-CB5P filter which has been specially designed with premium Coconut shell carbon as a final Polishing cartridge to improve taste and render a pleasant bottled water like taste to your drinking water.

NOTICE: Do not use with water that is microbiologically unsafe or of unknown quality without adequate disinfection before or after the system.

** NSF Standard 53 Certification Pending.*

*** This water filtration device has not finalized certification with NSF International and has not been approved by the California Water Resource Control Board, therefore, it is not available for sale in the State of California for the contaminant reduction claims listed.*

The Hydro Guard™ U4000-CER also incorporates throughout the solid carbon filter Microban® technology. Microban® antimicrobial technology inhibits the growth of bacteria that can cause odors and fouling of the filter surface, so your filter keeps working at peak performance. On an unprotected surface, bacteria can double in number every 20 minutes causing premature fouling of the water filter. Microban® antimicrobial product protection works continuously to inhibit the growth of bacteria that can adversely affect filter performance.
