

QL2 SINGLE HEAD

Commercial Quality Filter Head

HDG-QL2 Single Filter Head

Commercial Quality Single Stage Filter Head

Everpure Compatible

Data Sheet

Hydro Guard™ HDG-QL2 Single Filter Head

is engineered for dependable performance in demanding commercial water filtration applications and is compatible with Everpure filter cartridges. It is ideal for foodservice, vending, and office coffee service (OCS) applications where reliable, high-capacity filtration is essential.

Hydro Guard™ HDG-QL2 Single Filter Head

includes a built-in water shut-off valve to simplify cartridge replacement and routine maintenance. A mounting bracket and screws are included for fast, convenient installation, while its commercial-grade construction is engineered for durability, strength, and long service life.

Hydro Guard™ HDG-QL2 Single Filter Head

is engineered for reliable operation and features corrosion-resistant hardware for long-lasting performance in demanding commercial environments. Although it does not include a built-in water shut-off valve, all wetted parts are manufactured to NSF® standards, providing added confidence in water quality and overall system reliability.

FEATURES

- ✓ Commercial-Grade Durable Filter Head Design
- ✓ Compatible With Everpure Cartridges
- ✓ Includes Mounting Bracket And Screws
- ✓ Fast, Tool-Free Cartridge Replacement
- ✓ Corrosion-Resistant Commercial Construction

Disclaimer: Hydro Guard and Hydronix Water technology is not affiliated, associated, authorized, endorsed by, or in any way officially connected with the Everpure brand, Pentair Filtration Solutions, or any of its companies. All product and company names are trademarks™ or registered trademarks® of their respective holders. Use of them does not imply any affiliation with or endorsement by them.

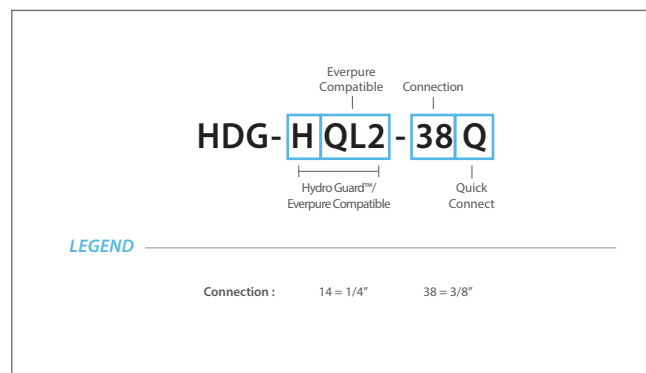

INSTALLATION INSTRUCTIONS

- Select a mounting location capable of supporting the system's operating weight.
- Install the filter head in a vertical position and allow a minimum of 2½" (6.35 cm) of clearance below the cartridge for easy replacement.
- Flush the system by running water through the filter for five (5) minutes before use.
- Replace the filter cartridge annually, when the rated capacity is reached, or whenever a noticeable reduction in water flow occurs

OPERATION INSTRUCTIONS

- Change cartridges on a regular six (6) month preventative maintenance program.
- Change cartridges when capacity is reached or when pressure falls below 10 psi (0.7 bar).
- Always flush the filter cartridge at time of installation and cartridge change.
